

Some of the work that we are proud of this week...

Tawny Owls

Friday 22nd January Science

Insects

- Has six legs ✓
- Most have wings ✓
- Develop larvae and pupae or other stages ✓
- Develop into nymphs ✓

Amphibians

- Hatch from eggs ✓
- with air sacs ✓
- Go through the process of metamorphosis ✓
- They have gills ✓
- Have four legs ✓
- Develop into tadpoles ✓

The main difference between most insects who undergo metamorphosis and those who don't is that those who do produce larvae then pupae but if they don't they produce nymphs.

Spellings
