WALT - create original pieces that show a range of influences and styles (A)

I think that the colour of the gold against the brown worked well because it makes the gold show up more. I also the thickness of the handle works well because you can pick it up by the handle.

If I was to make my pot again I would change the shape.

I think my greek pot is different from Ancient Greek pots because of the colours and the shapes. I think the pots would be used for similar reason.
