

Thursday 7th October

WALT: HISTORY Suggest causes and consequences of some of the main events and changes in history (Milestone 2)
Describe different accounts of historical events, explaining some of the reasons why accounts may differ. (Milestone 2)

Using your notes taken from our drama activity last week, complete the thoughts and feelings bubbles to create two different accounts from two different societies explaining what you believe would have been their thoughts and feelings about the growth of the Victorian Railway.

I hate the railway because I have to work in dangerous conditions.

I hate the railway development because we work long shifts down the mines.

Children

Gloomy because the mines aren't fun.

I love the railway because I can travel to the coast for a holiday with my family.

I love ^{the} railway because my produce can be transported to other places.

I love the development of the railway because I can get more workers.

Factory Owners

I love the development of the railway because I'm rich from the railway.

Challenge:

Using your notes, write an account from a society of your choice to explain what you believe would have been their thoughts and feelings about the growth of the Victorian Railway.

- Consider thoughts and feelings displayed from groups presentations and dramas.

Middle class family

Thoughts - I love the railway I can travel with my family to the beach and relax.

Thoughts - I love the railway because it gives me a little break.

I think for the middle class families, it was positive because they are all very rich and they can afford to go on holiday with their family and friends.

Well done, Rosie. (10)
