

Thursday 17th September

I think the torch will shine through the ~~torch~~ timer because it is transparent.

Tissue Paper Prediction

I think the light will shine through the tissue paper as it is translucent.

Deep

Does blocking light prove that it travels? (reason, investigate)

Yes because when light is blocked with a reflective material, such as a mirror, it bounces off into an eye. If you block an opaque object, it absorbs the light whereas with translucent and transparent objects, the light shines through.

Super work  
Connie
